Scientific Research Base

An experienced team of authors from TERC, led by Susan Jo Russell and Karen Economopoulous incorporated findings from a large body of scientific research and professional journals articles available to develop the instructional content and pedagogy and the assessment tools in *Investigations in Number, Data, and Space, Second Edition*.

In developing the Second Edition of *Investigations*, the authors drew on current research and practice. The following list is a selection of some of the resources and references the authors found useful in their work and which also may be of interest to users of the curriculum.
