INTRODUCTION

This document demonstrates how *Environmental Science: Your World, Your Turn Science* ©2011 meets the Kansas Science Education Standards for Grades 8-12. Correlation page references are to the Student and Teacher's Editions and are cited at the page level.

Real Issues. Real Data. Real Choices.

Pearson's *Environmental Science: Your World, Your Turn* is based on real, current, and relevant content that brings the world of environmental science to life. All while making it personal and actionable for every student.

Exploring Real Issues through an Integrated Case-Study Approach

Opening every chapter, and integrated throughout the text and support materials both online and in print, the Central Case provides a consistent and engaging path for teaching core environmental science principles.

Based on the Most Current Data Available

A science program is only as good as the data. *Environmental Science: Your World, Your Turn* provides the most up-to-date data available from a wide-range of trusted sources. Maps, graphs, yesterday's news articles...and more.

Motivates Students to Make Choices

Environmental Science: Your World, Your Turn empowers students to draw their own conclusions and encourages them to think and act on both local and global levels. They will build the critical thinking skills that they will need long after the class ends.

Kansas Science Education Standards Grades 8-12	Pearson Environmental Science Your World, Your Turn, ©2011
KANSAS Science Education Standards	
Grades 8-12	
STANDARD 1: SCIENCE AS INQUIRY – The student will develop the abilities necessary to do scientific inquiry and develop an understanding of scientific inquiry.	
Benchmark 1: The student will demonstrate the abilities necessary to do scientific inquiry.	
The student...	
1. actively engages in asking and evaluating research questions.	SE/TE: Quick Lab: 22,37,80,152,237,263,334,437,49,486,520,591; Go Outside: 19, 102, 183, 310, 36, 396, 467, 564
2. ▲ actively engages in investigations, including developing questions, gathering and analyzing data, and designing and conducting research	SE/TE: Quick Lab: 22,37,80,152,237,263,334,437,49,486,520,591; Go Outside: 19, 102, 183, 310, 36, 396, 467, 564; Analyze Data: 33, 62,95, 123, 161,197, 223, 253, 289, 319, 349, 389, 417, 449, 479, 513, 547 ,579, 609
3. ▲ actively engages in using technological tools and mathematics in their own scientific investigations.	SE/TE: SH-2-8, MyEnvironmentalScience.com: 30, 58, 92, 120, 158, 194, 220, 250, 286, 316, 346, 386, 414, 446, 476, 510, 544, 576, 606; Analyze Data: 33, 62,95, 123, 161,197, 223, 253, 289, 319, 349, 389, 417, 449, 479, 513, 547 ,579, 609
4. actively engages in conducting an inquiry, formulating and revising his or her scientific explanations and models (physical, conceptual, or mathematical) using logic and evidence, and recognizing that potential alternative explanations and models should be considered.	SE/TE: 14-20; Quick Lab: 22,37,80,152,237,263,334,437,49,486,520,591; Go Outside: 19, 102, 183, 310, 36, 396, 467, 564; SH-2-8; Analyze Data: 33, 62,95, 123, 161,197, 223, 253, 289, 319, 349, 389, 417, 449, 479, 513, 547 ,579, 609
5. actively engages in communicating and defending the design, results, and conclusion of his/her investigation.	SE/TE: 21-23, Write About It: 33, 62,95, 123, 161,197, 223, 253, 289, 319, 349, 389, 417, 449, 479, 513, 547 ,579, 609
STANDARD 2A: CHEMISTRY– The student will develop an understanding of the structure of atoms, <i>compounds</i>, chemical reactions, and the interactions of energy and matter.	
Benchmark 1: The student will understand the structure of the atom.	
The student ...	
1. ▲ understands atoms, the fundamental organizational unit of matter, are composed of subatomic particles. Chemists are primarily interested in the protons, electrons, and neutrons found in the atom.	SE/TE: 64-65, 537
2. understands isotopes are atoms with the same atomic number (same number of protons) but different numbers of neutrons. The nuclei of some atoms are radioactive isotopes that spontaneously decay, releasing radioactive energy.	SE/TE: 539-540

**Pearson Environmental Science: Your World, Your Turn, ©2011
to the
Kansas Science Education Standards
Grades 8-12**

Kansas Science Education Standards Grades 8-12	Pearson Environmental Science Your World, Your Turn, ©2011
Benchmark 2: The students will understand the states and properties of matter.	
The student ...	
1. ▲ understands chemists use kinetic and potential energy to explain the physical and chemical properties of matter on earth that may exist in any of these three states: solids, liquids, and gases.	SE/TE: 517-518
2. ▲ understands the periodic table lists elements according to increasing atomic number. This table organizes physical and chemical trends by groups, periods, and sub-categories.	SE/TE: SH-32
3. ▲ understands chemical bonds result when valence electrons are transferred or shared between atoms. Breaking a chemical bond requires energy. Formation of a chemical bond releases energy. Ionic compounds result from atoms transferring electrons. Molecular compounds result from atoms sharing electrons. For example, carbon atoms can bond to each other in chains, rings, and branching networks. Branched network and metallic solids also result from bonding.	SE/TE: 65-69
Benchmark 3: The student will gain a basic concept of chemical reactions.	
The student ...	
1. ▲ understands a chemical reaction occurs when one or more substances (reactants) react to form a different chemical substance(s) (products). There are different types of chemical reactions all of which demonstrate the Law of Conservation of Matter and Energy.	SE/TE: 83
2. understands how to perform mathematical calculations regarding the Law of Conservation of Matter, i.e., through stoichiometric relationships.	This standard falls outside of the program scope and sequence.
3. understands the differences and reactions between acids, bases, and salts. Perform calculations to determine the concentration of ions in solutions.	This standard falls outside of the program scope and sequence.

to the
Kansas Science Education Standards
Grades 8-12**

Kansas Science Education Standards Grades 8-12	Pearson Environmental Science Your World, Your Turn, ©2011
STANDARD 2B: PHYSICS – The student will develop an understanding of the structure of atoms, <i>compounds</i>, chemical reactions, and the interactions of energy and matter.	
Benchmark 1: The student will understand the relationships between force and motion.	
The student ...	
1. ▲ understands Newton’s Laws and the variables of time, position, velocity, and acceleration can be used to describe the position and motion of particles.	This standard falls outside of the program scope and sequence.
2. understands physicists use conservation laws to analyze the motion of objects.	This standard falls outside of the program scope and sequence.
Benchmark 2: The student will understand the conservation of mass and energy, and the First and Second Laws of Thermodynamics.	
The student ...	
1. understands matter has energy. Mass and energy can be interchanged. The total energy in the universe is constant, but the type of energy may vary.	SE/TE: 516-521
2. ▲ understands the first law of thermodynamics states the total internal energy of a substance (the sum of all the kinetic and potential energies of its constituent molecules) will change only if heat is exchanged with the environment or work is done on or by the substance. In any physical interaction, the total energy in the universe is conserved.	SE/TE: 141-143
3. understands the second law of thermodynamics that states the entropy of the universe is increasing.	SE/TE: 144-145
Benchmark 3: The student will understand the nature of the fundamental interactions of matter and energy.	
The student ...	
1. There are four fundamental forces in nature: strong nuclear force, weak nuclear force, electromagnetic force, and gravitational force.	SE/TE: 519
2. ▲ understands waves have energy and can transfer energy when they interact with matter.	This standard falls outside of the program scope and sequence.
3. The student understand interference – how waves interact with other waves	This standard falls outside of the program scope and sequence.
4. The student will understand the principles of reflection and refraction.	This standard falls outside of the program scope and sequence.
5. ▲ understands electromagnetic waves result when a charged particle is accelerated or decelerated.	This standard falls outside of the program scope and sequence.

**Pearson Environmental Science: Your World, Your Turn, ©2011
to the
Kansas Science Education Standards
Grades 8-12**

Kansas Science Education Standards Grades 8-12	Pearson Environmental Science Your World, Your Turn, ©2011
6. The student understands basic electrostatics and circuits.	This standard falls outside of the program scope and sequence.
STANDARD 3: LIFE SCIENCE – The student will develop an understanding of the cell, molecular basis of heredity, biological evolution, interdependence of organisms, matter, energy, and organization in living systems, and the behavior of organisms.	
Benchmark 1: The student will demonstrate an understanding of the structure and function of the cell.	
The student ...	
1. understands cells are composed of a variety of specialized structures that carry out specific functions.	SE/TE: 68
2. ▲ understands cell functions involve specific chemical reactions.	SE/TE: 68
3. understands cells function and replicate as a result of information stored in DNA and RNA molecules.	SE/TE: 68
4. understands some plant cells contain chloroplasts, which are the sites of photosynthesis.	SE/TE: 84, 142
5. understands cells can differentiate, thereby enabling complex multicellular organisms to form.	SE/TE: 68
Benchmark 2: The student will demonstrate an understanding of chromosomes, genes, and the molecular basis of heredity.	
The student ...	
1. ▲ understands living organisms contain DNA or RNA as their genetic material, which provides the instructions that specify the characteristics of organisms.	SE/TE: 68
2. understands organisms usually have a characteristic number of chromosomes; one pair of these may determine the sex of individuals.	SE/TE: 68
3. ▲ understands hereditary information is contained in genes, located in the chromosomes of each cell.	SE/TE: 68
4. understands gametes carry the genetic information to the next generation.	SE/TE: 68
5. understands expressed mutations occur in DNA at very low rates.	SE/TE: 127
Benchmark 3: The student will understand biological evolution.	
The student ...	
1 ▲ understands biological evolution, descent with modification, is a scientific explanation for the history of the diversification of organisms from common ancestors	SE/TE: 126-130

**Pearson Environmental Science: Your World, Your Turn, ©2011
to the
Kansas Science Education Standards
Grades 8-12**

Kansas Science Education Standards Grades 8-12	Pearson Environmental Science Your World, Your Turn, ©2011
2. understands populations of organisms adapt to environmental challenges and changes as a result of natural selection, genetic drift, and various mechanisms of genetic change.	SE/TE: 126-130
3. ▲ understands biological evolution is used to explain the earth's present day biodiversity: the number, variety and variability of organisms.	SE/TE: 126-130
4. ▲ understands organisms vary widely within and between populations. Variation allows for natural selection to occur.	SE/TE: 127-129
5. understands the primary mechanism acting on variation is natural selection.	SE/TE: 127-129
6. understands biological evolution is used as a broad, unifying theoretical framework for biology.	SE/TE: 126-127
Benchmark 4: The student will understand the interdependence of organisms and their interaction with the physical environment.	
The student ...	
1. ▲ understands atoms and molecules on the earth cycle among the living and nonliving components of the biosphere.	SE/TE: 74-75, 79, 102
2. understands energy is received, transformed and expended in ecosystems.	SE/TE: 101-102
3. ▲ understands the distribution and abundance of organisms and populations in ecosystems are limited by the carrying capacity.	SE/TE: 101-102
4. understands organisms cooperate and compete in complex, interdependent relationships	SE/TE: 104-109
5. understands human beings live within and impact ecosystems.	SE/TE: 242-247
Benchmark 5: The student will develop an understanding of matter, energy, and organization in living systems.	
The student ...	
1. understands living systems require a continuous input of energy to maintain their chemical and physical organization.	SE/TE: 64-71
2. ▲ understands the sun is the primary source of energy for life through the process of photosynthesis.	SE/TE: 84, 142, 522
3. ▲ understands food molecules contain biochemical energy, which is then available for cellular respiration.	SE/TE: 85, 143
4. understands the structure and function of an organism serve to acquire, transform, transport, release, and eliminate the matter and energy used to sustain the organism.	SE/TE: 141-145

**Pearson Environmental Science: Your World, Your Turn, ©2011
to the
Kansas Science Education Standards
Grades 8-12**

Kansas Science Education Standards Grades 8-12	Pearson Environmental Science Your World, Your Turn, ©2011
Benchmark 6: The student will understand the behavior of animals.	
The student ...	
1. ▲ understands animals have behavioral responses to internal changes and to external stimuli.	SE/TE: 100-103, 133-138
2. understands most multicellular animals have nervous systems that underlie behavior.	SE/TE: 133-138
3. understands behaviors are often adaptive when viewed in terms of survival and reproductive success.	SE/TE: 133-138, 146-148
Benchmark 7: The student will demonstrate an understanding of the diversity of structure and function in organisms.	
The student ...	
1. understands differences in structure and function among organisms and can identify the characteristics of relevant life forms.	SE/TE: 133-138, 146-148
2. ▲ understands that homeostasis is the dynamic regulation and balance of an organisms internal environment to maintain conditions suitable for survival.	SE/TE: 133-138, 146-148
3. ▲ understands that living things change following a specific pattern of developmental stages called life cycles.	SE/TE: 83-89
4. understands that in complex organisms there is a division of labor into specific body systems i.e., respiration, digestion, nervous, endocrine, excretion, circulatory, reproductive, immune, skeletal and muscle.	This standard falls outside of the program scope and sequence.
5. understands taxonomy is the systematic way in which organism are placed into a hierarchical classification system, according to their physical and genetic characteristics and their evolutionary history.	SE/TE: 126-132, 146-148, 201
STANDARD 4: EARTH AND SPACE SCIENCE – The student will develop an understanding of energy in the earth system, geochemical cycles, the formation and organization of the earth system, the dynamics of the earth/moon/sun system, and the organization and development of the universe.	
Benchmark 1: The student will develop an understanding of the sources of energy that power the subsystems and cycles of the dynamic earth: the geosphere, hydrosphere, atmosphere and biosphere.	
The student ...	
1. understands constructive and destructive processes, including weathering, erosion and deposition, dynamically reshape the surface of the earth.	SE/TE: 353-361
2. ▲ understands the theory of Plate Tectonics explains that internal energy drives the earth's ever changing structure.	SE/TE: 77-78

**Pearson Environmental Science: Your World, Your Turn, ©2011
to the
Kansas Science Education Standards
Grades 8-12**

Kansas Science Education Standards Grades 8-12	Pearson Environmental Science Your World, Your Turn, ©2011
3. The ultimate source of atmospheric and oceanic energy comes from the sun. Energy flow drives global climate and weather. Climate and weather are influenced by geographic features, cloud cover, and the earth's rotation.	SE/TE: 484-490
4. Understands the processes of water cycling through surface water (oceans, lakes, streams, glaciers), ground water (aquifers), and the atmosphere. (hydrological cycle)	SE/TE: 80-82, 420-425, 439
Benchmark 2: The student will develop an understanding of the origin and development of the dynamic earth system.	
The student ...	
1. ▲ understands geological time is used to understand the earth's past.	This standard falls outside of the program scope and sequence.
Benchmark 3: The student will develop an understanding of dynamics of our solar system.	
The student ...	
1. understands gravitational attraction of objects in the solar system keeps solar system objects in orbit.	This standard falls outside of the program scope and sequence.
2. ▲ understands the relationship between the earth, moon, and sun explains the seasons, tides and moon phases.	SE/TE: Opportunity to address this standard: 48-460
3. understands the relative sizes and distances of objects in the solar system.	This standard falls outside of the program scope and sequence.
4. understands the sun, earth, and other objects in the solar system formed from a nebular cloud of dust and gas.	This standard falls outside of the program scope and sequence.
Benchmark 4: The student will develop an understanding of the organization of the universe, and its development	
The student ...	
1. ▲ understands stellar evolution.	This standard falls outside of the program scope and sequence.
2. understands the current scientific explanation of the origin and structure of the universe.	This standard falls outside of the program scope and sequence.
3. understand how the tools of astronomy have revolutionized the study of the universe.	This standard falls outside of the program scope and sequence.

**Pearson Environmental Science: Your World, Your Turn, ©2011
to the
Kansas Science Education Standards
Grades 8-12**

Kansas Science Education Standards Grades 8-12	Pearson Environmental Science Your World, Your Turn, ©2011
STANDARD 5: SCIENCE AND TECHNOLOGY – The student will develop understandings about the relationship between science and technology.	
Benchmark 1: The student will develop an understanding that technology is applied science.	
The student ...	
1. ▲ understands technology is the application of scientific knowledge for functional purposes.	SE/TE: 246-247
2. understands creativity, imagination, and a broad scientific knowledge base are required to produce useful results.	SE/TE: 14-20
3. understands science advances new technologies. New technologies open new areas for scientific inquiry.	SE/TE: Opportunity to address this standard: 6-8, 11-20
STANDARD 6: SCIENCE IN PERSONAL AND ENVIRONMENTAL PERSPECTIVES – The student will develop an understanding of personal and community health, population growth, natural resources, environmental quality, natural and human-induced hazards, and science and technology in local, national, and global settings.	
Benchmark 1: The student will develop an understanding of the overall functioning of human systems and their interaction with the environment in order to understand specific mechanisms and processes related to health issues.	
The student ...	
1. understands some chemical and physical hazards and accidents can be avoided through safety education	This standard falls outside of the program scope and sequence.
2. understands the severity of disease symptoms is dependent on many factors,	SE/TE: 261-262, 263-266
3. understands informed personal choices concerning fitness and health involve an understanding of chemistry and biology.	This standard falls outside of the program scope and sequence.
4. understands selection of foods and eating patterns determine nutritional balance which affects emotional and physical well-being.	This standard falls outside of the program scope and sequence.
Benchmark 2: The student will demonstrate an understanding of population growth.	
The student ...	
1. understands the rate of change in populations is determined by the combined effects of birth, death, emigration, and immigration.	SE/TE: 228-237
2. understands a variety of factors influence birth rates and fertility rates.	SE/TE: 234-237
3. understands populations have limits to growth.	SE/TE: 228-237
Benchmark 3: The student will understand that human populations use natural resources and influence environmental quality.	
The student ...	
1. ▲ understands natural resources from the lithosphere and ecosystems are required to sustain human populations.	SE/TE: 242-247; addressed throughout book

**Pearson Environmental Science: Your World, Your Turn, ©2011
to the
Kansas Science Education Standards
Grades 8-12**

Kansas Science Education Standards Grades 8-12	Pearson Environmental Science Your World, Your Turn, ©2011
2. understands earth does not have infinite resources.	SE/TE: Standard addressed throughout the book; sample pages include 240-247,430-443,497-501, 596-603
Benchmark 4: The student will understand the effect of natural and human-influenced hazards.	
The student ...	
1 understands natural processes of earth may be hazardous for humans.	SE/TE: 277-283
2. understands there is a need to assess potential risk and danger from natural and human-induced hazards.	SE/TE: 256-260, 261-267, 268-276, 277-283
Benchmark 5: The student will develop an understanding of the relationship between science, technology, and society.	
The student ...	
1. understands progress in science and technology can be affected by social issues and challenges. Science and technology indicate what can happen, not what should happen.	SE/TE: 24-27
STANDARD 7: HISTORY AND NATURE OF SCIENCE – The student will develop understanding of science as a human endeavor, the nature of scientific knowledge, and historical perspectives.	
Benchmark 1: The student will develop an understanding that science is a human endeavor that uses models to describe and explain the physical universe.	
The student...	
1. demonstrates an understanding of science as both vocation and avocation.	SE/TE: T30-T39 Unit Case Studies 1-5 offer students the opportunity to address this standard.
2. explains how science uses peer review, replication of methods, and norms of honesty.	SE/TE: 21-23
3. recognizes the universality of basic science concepts and the influence of personal and cultural beliefs that embed science in society.	SE/TE: 24-25
4. recognizes that society helps create the ways of thinking (mindsets) required for scientific advances, both toward training scientists and educating a populace to utilize benefits of science (e.g., standards of hygiene, attitudes toward forces of nature, etc.).	SE/TE: 24-27
5. understands there are many issues which involve morals, ethics, values or spiritual beliefs that go beyond what science can explain, but for which solid scientific literacy is useful.	SE/TE: 24-27
6. recognizes society's role in supporting topics of research and determining institutions where research is conducted.	SE/TE: 21-23

**Pearson Environmental Science: Your World, Your Turn, ©2011
to the
Kansas Science Education Standards
Grades 8-12**

Kansas Science Education Standards Grades 8-12	Pearson Environmental Science Your World, Your Turn, ©2011
Benchmark 2: The student will develop an understanding of the nature of scientific knowledge.	
The student ...	
1. understands scientific knowledge describes and explains the physical world in terms of matter, energy, and forces. Scientific knowledge is provisional and is subject to change as new evidence becomes available.	SE/TE: 64-71
2. understands scientific knowledge begins with empirical observations, which are the data (also called facts or evidence) upon which further scientific knowledge is built.	SE/TE: 14-20
3. understands scientific knowledge consists of hypotheses, inferences, laws, and theories.	SE/TE: 14-20
4. understands a testable hypothesis or inference must be subject to confirmation by empirical evidence	SE/TE: 14-20
Benchmark 3: The student will understand science from historical perspectives.	
The student...	
1. demonstrates an understanding of the history of science.	SE/TE: Opportunities to address this standard: 12-13, 14-20
2. demonstrates a knowledge that scientific method historically proceeded from an inductive approach rather than a deductive approach.	SE/TE: 14-20
