Nebraska College and Career Ready Standards for Science, Grade 2**

**Introduction**

The following document demonstrates how the ***Elevate Science, ©2019*** program supports the Nebraska College and Career Ready Standards for Science, Grade 2. For each standard, correlation references are to the Student Edition and Teacher Edition where applicable.

***Elevate Science*** is a comprehensive K-5 science program that focuses on active, student-centered learning. It builds students' critical thinking, questioning, and collaboration skills, and fuels interest in STEM and creative problem solving while supporting literacy development for elementary-age learners. Developed to support Next Generation Science Standards (NGSS), ***Elevate Science*** integrates three dimensional learning of the Scientific and Engineering Practices, Crosscutting Concepts (CCC), and Disciplinary Core Ideas (DCIs).

The ***Elevate Science*** blended print and digital curriculum engages students in phenomena-based inquiry and hands-on investigations.

- Problem-based learning Quests put students on a journey of discovery
- Engineering-focused features infuse STEM learning
- Coding and innovation engage students and build 21<sup>st</sup> century skills

The Teacher's Edition of ***Elevate Science*** helps elementary educators teach science with confidence: Scaffolding, ELD, differentiated instruction, and an instructional organization based upon the 5E learning model, (Engage, Explore, Explain, Extend/Elaborate, Evaluate), provide all the support needed for successful teaching practices. Professional development offers point-of-use support. A full-view approach to inquiry and testing provides new options for a variety of hands-on labs and assessments for three-dimensional learning.

***Elevate Science*** prepares students for the challenges of tomorrow, building strong reasoning skills and critical thinking strategies as they engage in explorations, formulate claims, and gather and analyze data that promote evidence-based argument. Designed for today's classroom, preparing students for tomorrow's world. ***Elevate Science*** promises to:

- Elevate thinking.
- Elevate learning.
- Elevate teaching.

<b>Nebraska College and Career Ready Standards for Science, Grade 2</b>		<b>Elevate Science, ©2019</b>
SC.2.3	Structure and Properties of Matter	
SC.2.3.1	Gather, analyze, and communicate evidence of the structure, properties, and interactions of matter.	
SC.2.3.1.A	Plan and conduct an investigation to describe and classify different kinds of materials by their observable properties.	<b>SE/TE:</b> uConnect Lab: Which object is bigger?, 4 Jumpstart Discovery!, 6 uInvestigate Lab: What is different?, 7 Matter Everywhere, 8 Test Properties, 18 Quest Check-In: Observe, Measure, Test?, 19 uInvestigate Lab: Which package fits the blocks?, 21 uDemonstrate Lab: What makes something sink or float?, 40-41
SC.2.3.1.B	Analyze data obtained from testing different materials to determine which materials have the properties that are best suited for an intended purpose.	<b>SE/TE:</b> Quest Check-In: Build with Solids, Liquids, and Gases, 11 uInvestigate Lab: What can beavers teach engineers?, 15 Quest Check-In Observe, Measure, Test, 19 Uses Solids, 22 Quest Check-In: How do you use shapes when building?, 24-25 Quest Connection, 28 Quest Check-In: Liquid and Gas Toys, 32 Quest Findings: Toy Building Kit, 34 Quest Kickoff: Building Bridges, 44-45 Quest Check-In: How does temperature change matter over time?, 59 Quest Findings: Building Bridges, 68
SC.2.3.1.C	Analyze data from tests of two objects designed to solve the same problem to compare the strengths and weaknesses of how each performs.	<b>SE/TE:</b> Quest Findings!: Save the Town, 140 uDemonstrate Lab: How can you compare different solutions?, 146-147

to the  
Nebraska College and Career Ready Standards for Science, Grade 2**

<b>Nebraska College and Career Ready Standards for Science, Grade 2</b>		<b>Elevate Science, ©2019</b>
SC.2.3.1.D	Make observations to construct an evidence-based account of how an object made of a small set of pieces can be disassembled and made into a new object.	<b>SE/TE:</b> uDemonstrate Lab: How can you make something new?, 74-75
SC.2.3.1.E	Construct an argument with evidence that some changes caused by heating or cooling can be reversed and some cannot.	<b>SE/TE:</b> uInvestigate Lab: How can you change objects?, 49 Matter Can Change In Many Ways, 52 Quest Check-In: Matter Can Change, 53 uInvestigate Lab: How does heating and cooling change matter?, 55 Heating and Cooling, 57 Reversible or Not, 58 Topic Assessment, 70-71
SC.2.7	Interdependent Relationships in Ecosystems	
SC.2.7.2	Gather, analyze, and communicate evidence of interdependent relationships in ecosystems.	
SC.2.7.2.A	Plan and conduct an investigation to determine if plants need sunlight and water to grow.	<b>SE/TE:</b> Jumpstart Discovery!, 162 uInvestigate Lab: What do plants need to grow?, 163 What Plants Need, 164 Evidence-Based Assessment, 186-187 uDemonstrate Lab: How does a plant make oxygen?, 188-189
SC.2.7.2.B	Develop a simple model that mimics the function of an animal in dispersing seeds or pollinating plants.	<b>SE/TE:</b> uInvestigate Lab: How can You Model How Animals Spread Seeds, 175 Quest Check-In Lab: Pollination, 178-179 uEngineer It!: Here's the Buzz, 180-181
