

Do my teachers feel prepared to effectively implement the Common Core?

BREAKTHROUGH
RESULTS

With our California Common Core Readiness Assessment, you won't have to wonder.

In just 15 minutes, your staff will complete an online assessment, letting you systematically explore the current state of educational practices in your school or district. This will help evaluate your staff's readiness to implement the Common Core State Standards with fidelity.

After the assessment, Pearson will measure participants' responses and:

- 1 | Determine current professional development needs, and the instructional and leadership practices your staff requires to support the Common Core,
- 2 | Provide an aggregated report of the findings (all individual responses are kept confidential), and
- 3 | Use the results to create a targeted Common Core professional development plan that meets your staff's specific needs.

Pearson also offers in-depth College and Career Readiness Needs Assessment as well as a Common Core Assessment Readiness: Technical Infrastructure Analysis for schools and districts.
