

Hillsborough County Public Schools

Grades K-5

Hillsborough County Professional Development

To ensure that we attend to the needs of Hillsborough County educators throughout the duration of the *enVision Florida Mathematics* implementation, Pearson proudly offers the **Hillsborough County Public Schools K-5 Partnership Package**, which includes the following:

- **No one knows the needs of Hillsborough County teachers and students better than the educators in Hillsborough County.** It is with this idea in mind that Pearson is proudly offering to grant funding of up to \$480,000 to allow HCPS to hire up to 6 District Resource Teacher positions. This funding can be used to fund positions in any combination across the 5-year adoption time line. Ex: 2 DRTs for 3 years or 3 DRTs for 2 years.
- **Your success is our success!** Your district will enjoy working with your Pearson Customer Success Manager (CSM). With “customer success” in the job title, you should feel assured about the dedication of support your CSM will provide. The Pearson CSM will partner with you to co-define and jointly pursue success metrics focused on specific outcomes, supporting your specific initiatives and goals. Throughout the academic year, the Pearson CSM brings both passion and purpose to help ensure positive learning and instructional outcomes are reached for all schools, educators, learners, families, and communities.
- **Great Professional Development training will help you tap the fullest potential to implement the program with fidelity.** In addition to the above support, we offer Program Activation PD services both in person and online for the life of the adoption of *enVision Florida* for all teachers (please see details below).
- **Go deeper in your training to address your priorities.** Going beyond Program Activation, we offer PD services that dive deeper to target your specific needs. We are offering up to 10 Professional Development days (going beyond and in addition to Program Activation) on math topics related to instruction (please see details below). Access to our authorship team for keynote speaking or other such events, based upon advance notice and author availability.

Program Activation

Program Activation, also known as program orientation, for *enVision Florida Mathematics* is available in several delivery options to meet the schedules of district teachers and administrators. Options include a 3 to 6-hour on-site training as well as virtual training through online modules & webinars available at myPearsonTraining.com.

Face-to-face and shoulder-to-shoulder on-site training will help you hit the ground running. Working in collaboration with HCPS leadership, we will customize our on-site Program Activation session to provide HCPS educators with training on the critical program components they need to achieve success on Day 1 in the classroom. This PD session is interactive and includes a culminating, application-oriented activity, such as planning a lesson, so participants can immediately apply what they've learned.

Online Resources Through myPearsonTraining provide support anytime and anywhere. For additional support, district educators can access free online resources and materials through our flexible and convenient online training platform, MyPearsonTraining.

Let us create a customized online learning journey for your district on MyPearsonTraining. Custom Training Pages use comprehensive training playlists, covering the entire learning journey, from program implementation to classroom management and assessment topics. Each self-serve playlist contains hand-curated content, including webinars, tutorials, guides, videos, and planning templates and resources to help HCPS teachers learn and implement their new program with fidelity.

Grades K-5

Hillsborough County Professional Development

Hillsborough County educators will also have access to the following Pearson support:

- Chat and Email Support.
- On-Demand Tutorials and Guides.
- Library of Training Resources including: User guides, training guides, implementation ideas, back-to-school tips, end-of-year procedures, and more.
- On-demand scheduling for webinars, whether for individuals or groups.

Professional Development Options going beyond Program Activation

The Hillsborough County K-5 Partnership Package is designed to empower educators with pedagogical strategies, best practices, and targeted coaching supports to change practice and ensure implementation efficacy. Based on district and school priorities, listed below are several of the professional development workshops available.

Implementation Essentials

Our Implementation Essential Workshop is designed to support educators in implementing the program with fidelity. Educators dig into the components, instructional design, and structure of *enVision Florida Mathematics*. Participants will practice applying specific features and design elements (including instructional philosophy, lesson structure, and content) to classroom practice through hands-on activities and observation of a demonstrated lesson.

Personalizing and Differentiating Instruction

The push for personalized instruction is evident across the country. *enVision Florida Mathematics* provides teachers with a wide array of strategies and resources to develop these plans. During this workshop, teachers determine strategies for early monitoring and intervention that ensures all students are on target to be ready for college and career.

Problem-Based Learning

Explore strategies that help students develop a deeper understanding of concepts through interacting with each other and their teachers. During this training, participants engage in activities that enhance their knowledge of

problem-based instruction as they explore how it develops conceptual understanding in elementary students. Participants walk away with effective strategies for using problem-based instruction to enhance student learning and tools to engage students in interactive learning.

Effective Use of the Digital Path

Use technology to empower students to learn math with deeper conceptual understanding. Through modeling and interaction, participants learn how to successfully blend Realize lessons using the print and digital components. Participants walk away with an understanding of the problem-based, interactive learning opportunities that enrich the print text and how to personalize learning to meet the needs of individual students.

enVision for Administrators

Administrators can customize their three-hour experience by choosing from several high-interest topics for their school or district needs. Administrators will leave the session armed with tools such as step-by-step training plans, Administrator Support Tools, and teacher self-checks to ensure long-term success.

Additionally, Professional Development is embedded directly in the *enVision Florida* curriculum via the online teacher account.

- Professional Development Videos on PearsonRealize.com support teacher planning of Topics and Lessons.
- Math Practices Animations for each math practice can be used by teachers and students anytime.
- Topic Overview videos provide important content information pertaining to each topic.
- Listen and Look For lesson videos discuss important content information for the lesson.
- Classroom Videos take the guesswork out of planning. Teacher videos offer insights, tips, & examples for every lesson part:
 - Step 1: Problem-Based Learning
 - Step 2A: Visual Learning: Enhanced Direct Instruction
 - Step 2B: Visual Learning: Practice and Problem Solving
 - Step 3: Assess and Differentiate
 - 3-Act Math, Mathematical Modeling
