# Table of Contents

## Chapter 1: Change Over Time

### The Big Question
- How do life forms change over time? 2

### Vocabulary Skills
- Identify Multiple Meanings 4

### Reading Skills
- 5

### Scenario Investigation: Worms Under Attack! 6

#### Lesson 1: Darwin’s Theory
- Unlock the Big Question 8
- Inquiry Skill: Develop Hypotheses 12
- Explore the Big Question 14
- do the math! Calculate the Mean and Interpret Data 16
- Answer the Big Question 17

#### Lesson 2: Evidence of Evolution
- Unlock the Big Question 18
- Inquiry Skill: Communicate 21

#### Lesson 3: Rate of Change
- Unlock the Big Question 22
- Inquiry Skill: Make Models 25

### Study Guide & Review and Assessment
- Review the Big Question 26
- Apply the Big Question 29
- Standardized Test Prep 30

### Science Matters
- The Incredible Shrinking Fish
- Walking Whales

---

**Lab zone**

Enter the Lab zone for hands-on inquiry.

- Scenario Investigation: Worms Under Attack!

**Chapter Lab Investigation:**
- Directed Inquiry: Guilty or Innocent?
- Open Inquiry: Guilty or Innocent?

**Inquiry Warm-Ups:**
- How Do Living Things Vary?
- How Can You Classify a Species?
- Making a Timeline

**Quick Labs:**
- Bird Beak Adaptations
- Finding Proof
- Large-Scale Isolation
- Slow or Fast?

---

Go online for engaging videos, interactivities, and virtual labs.
CHAPTER 2

Climate and Climate Change

The Big Question ............................................. 34
What factors affect Earth’s climate?

Vocabulary Skill: High-Use Academic Words ........ 36
Reading Skills .................................................. 37
Scenario Investigation: What Causes Our Climate? ... 38

LESSON 1
What Causes Climate? ........................................... 40
Unlock the Big Question ................................. 40
Inquiry Skill: Infer ............................................. 44

LESSON 2
Climate Regions .................................................. 48
Unlock the Big Question ................................. 48
Inquiry Skill: Communicate ............................... 57

LESSON 3
Changes in Climate ............................................ 58
Unlock the Big Question ................................. 58
Inquiry Skill: Interpret Data ............................... 62
do the math! Interpret Data ............................... 62

LESSON 4
Human Activities and Climate Change ................ 64
Unlock the Big Question ................................. 64
Inquiry Skill: Make Models ............................... 68
Explore the Big Question ............................... 69
Answer the Big Question ............................... 69

Study Guide & Review and Assessment ............... 70
Review the Big Question ............................... 70
Apply the Big Question ............................... 72
Standardized Test Prep ..................................... 73

Science Matters .................................................. 74
* Tracking Earth’s Gases From Space * Bacterial Rainmakers

Enter the Lab zone for hands-on inquiry.

Scenario Investigation: What Causes Our Climate?

Labzone

Chapter Lab Investigation:
• Directed Inquiry: Sunny Rays and Angles
• Open Inquiry: Sunny Rays and Angles

Inquiry Warm-Ups:
• How Does Latitude Affect Climate? • How Do Climates Differ?
• What Story Can Tree Rings Tell? • What Is the Greenhouse Effect?

Quick Labs:
• Inferring United States Precipitation Patterns * Classifying Climates
• Making and Interpreting a Climograph
• Climate Clues * Earth’s Movement and Climate * Greenhouse Gases and Global Warming

Go online for engaging videos, interactivities, and virtual labs.
Energy Resources

The Big Question .................................................. 78
What are some of Earth’s energy sources?

Vocabulary Skill: High-Use Academic Words ........ 80
Reading Skills ....................................................... 81
Scenario Investigation: Light Bulbs Can’t Use Much Energy ........................................ 82

LESSON 1
Fossil Fuels ......................................................... 84
Unlock the Big Question ........................................ 84
Inquiry Skill: Communicate .................................... 89
do the math! Interpret a Circle Graph ......................... 91

LESSON 2
Renewable Sources of Energy ................................ 92
Unlock the Big Question ........................................ 92
Inquiry Skill: Infer .................................................. 94
Explore the Big Question ....................................... 98
Answer the Big Question ....................................... 99

LESSON 3
Energy Use and Conservation ............................. 102
Unlock the Big Question ........................................ 102
Inquiry Skill: Observe ............................................. 104

Study Guide & Review and Assessment ............... 108
Review the Big Question ...................................... 108
Apply the Big Question ....................................... 110
Standardized Test Prep ........................................... 111

Science Matters .................................................. 112
• How Low Is Low Impact? • Offshore Petroleum Engineer
• Hydrokinetic Energy

Labzone
Enter the Lab zone for hands-on inquiry.

Scenario Investigation: Light Bulbs Can’t Use Much Energy

Chapter Lab Investigation:
• Directed Inquiry: Design and Build a Solar Cooker
• Open Inquiry: Design and Build a Solar Cooker

Inquiry Warm-Ups: • What’s in a Piece of Coal? • Can You Capture Solar Energy?
• Which Bulb Is More Efficient?

Quick Labs: • Observing Oil’s Consistency
• Fossil Fuels • Producing Electricity • Human Energy Use • Future Energy Use

Go online for engaging videos, interactivities, and virtual labs.
CHAPTER 4

Land, Air, and Water Resources

The Big Question .................................................. 114
What can people do to use resources wisely?

Vocabulary Skill: Prefixes ........................................ 116
Reading Skills ..................................................... 117
STEM Activity: It’s All Water Under the Dam ............ 118

LESSON 1
Introduction to Environmental Issues .................. 120
Unlock the Big Question ........................................ 120
Inquiry Skill: Draw Conclusions ............................... 125

LESSON 2
Introduction to Natural Resources ...................... 126
Unlock the Big Question ........................................ 126
Inquiry Skill: Calculate .......................................... 130

LESSON 3
Conserving Land and Soil .................................... 132
Unlock the Big Question ........................................ 132
Inquiry Skill: Infer .................................................. 135

LESSON 4
Waste Disposal and Recycling ............................ 138
Unlock the Big Question ........................................ 138
Inquiry Skill: Graph ................................................ 139

LESSON 5
Air Pollution and Solutions ................................. 146
Unlock the Big Question ........................................ 146
Inquiry Skill: Communicate .................................... 149

LESSON 6
Water Pollution and Solutions ............................. 156
Unlock the Big Question ........................................ 156
Inquiry Skill: Design Experiments ........................... 161
Explore the Big Question ....................................... 162
Answer the Big Question ....................................... 163

Study Guide & Review and Assessment ................. 164
Review the Big Question ........................................ 164
Apply the Big Question ......................................... 166
Standardized Test Prep ........................................... 167

Science Matters ................................................... 168
* Please Don’t Pass the Plastic! * The Big Uncool

Go online for engaging videos, interactivities, and virtual labs.
Lesson 1
What Is Energy? ................................. 176
- Unlock the Big Question .......................... 176
- do the math! Calculate Kinetic Energy .......... 179
- Inquiry Skill: Calculate .......................... 179

Lesson 2
Forms of Energy ................................ 182
- Unlock the Big Question .......................... 182
- Inquiry Skill: Classify ............................ 186

Lesson 3
Energy Transformations and Conservation .......... 188
- Unlock the Big Question .......................... 188
- Explore the Big Question .......................... 192
- Answer the Big Question .......................... 193
- Inquiry Skill: Infer ................................. 193

Study Guide & Review and Assessment .............. 194
- Review the Big Question .......................... 194
- Apply the Big Question ............................ 196
- Standardized Test Prep ............................. 197

Science Matters ................................ 198
- Charge It!  ........................................ 198
- Power It Up! ....................................... 198
CHAPTER 6

Thermal Energy and Heat

The Big Question ............................................. 200
How does heat flow from one object to another?

Vocabulary Skill: Identify Multiple Meanings ... 202
Reading Skills ...................................................... 203
Scenario Investigation: Where Is
the Battery? ...................................................... 204

LESSON 1
Temperature, Thermal Energy, and Heat ............ 206
 Unlock the Big Question .................................... 206
 Inquiry Skill: Communicate ................................. 209

LESSON 2
The Transfer of Heat ........................................ 210
 Unlock the Big Question .................................... 210
 Explore the Big Question ................................. 212
 Answer the Big Question .................................. 213
 Inquiry Skill: Infer ............................................. 213

LESSON 3
Thermal Properties .......................................... 214
 Unlock the Big Question .................................... 214
 Inquiry Skill: Calculate ..................................... 216
do the math! Calculate Thermal Energy ........... 216

Study Guide & Review and Assessment ............. 218
 Review the Big Question ................................... 218
 Apply the Big Question ..................................... 220
 Standardized Test Prep ...................................... 221

Science Matters .............................................. 222
 * Tornado Alley * Hurricane Warning

Go online for engaging videos, interactivities, and virtual labs.
CHAPTER 7

Sound

The Big Question .............................................. 224
What determines the pitch and loudness of sound?

Vocabulary Skill: Identify Multiple Meanings ........ 226
Reading Skills ..................................................... 227

Scenario Investigation: Seeing With Your Ears .... 228

Lesson 1
The Nature of Sound ........................................... 230

Unlock the Big Question ...................................... 230
Inquiry Skill: Graph ............................................ 233
do the math! Analyzing Data ................................ 234

Lesson 2
Properties of Sound ........................................... 236

Unlock the Big Question ...................................... 236
Inquiry Skill: Make Models ................................... 237
Explore the Big Question .................................... 241
Answer the Big Question .................................... 241

Lesson 3
Music ................................................................. 242

Unlock the Big Question ...................................... 242
Inquiry Skill: Predict ........................................... 245

Lesson 4
Hearing Sound ..................................................... 246

Unlock the Big Question ...................................... 246
Inquiry Skill: Observe ......................................... 247

Lesson 5
Using Sound ......................................................... 250

Unlock the Big Question ...................................... 250
Inquiry Skill: Calculate ....................................... 252

Study Guide & Review and Assessment .............. 256

Review the Big Question ..................................... 256
Apply the Big Question ...................................... 258

Science Matters ..................................................... 260

• Can You Hear Me Now? • Noisy Occupations
CHAPTER 8

Light

The Big Question ........................................... 262
How does light interact with matter?
Vocabulary Skill: Use Prefixes ......................... 264
Reading Skills .............................................. 265
STEM Activity: Optical Security ......................... 266

LESSON 1
Light and Color ........................................... 270
Unlock the Big Question ................................ 270
Inquiry Skill: Predict ..................................... 276

LESSON 2
Reflection and Mirrors ................................... 278
Unlock the Big Question ................................ 278
Inquiry Skill: Classify ..................................... 279

LESSON 3
Refraction and Lenses .................................... 280
Unlock the Big Question ................................ 280
Inquiry Skill: Interpret Data ............................. 281
do the math! Analyzing Data ......................... 281
Explore the Big Question ............................. 282
Answer the Big Question ............................. 282

LESSON 4
Seeing Light ................................................ 283
Unlock the Big Question ................................ 283
Inquiry Skill: Observe .................................... 284

LESSON 5
Using Light ................................................ 286
Unlock the Big Question ................................ 286
Inquiry Skill: Infer ......................................... 287

Study Guide & Review and Assessment ............ 288
Review the Big Question ............................. 288
Apply the Big Question ............................. 290

Science Matters ............................................ 292
* Seeing Double * Hiding in Plain Sight

Go online for engaging videos, interactivities, and virtual labs.

PearsonRealize.com

Enter the Lab zone for hands-on inquiry.

STEM Activity: Optical Security

Chapter Lab Investigation:
* Directed Inquiry: Changing Colors
* Open Inquiry: Changing Colors

Quick Labs: * Developing Hypotheses
* Observing * Mirror Images * Bent Pencil
* Looking at Images * True Colors * What a View!
Characteristics of Waves

The Big Question: What are the properties of waves?  
Vocabulary Skill: Identify Multiple Meanings  
Reading Skills  
Scenario Investigation: Rogue Wave

LESSON 1
What Are Waves?  
Unlock the Big Question  
Inquiry Skill: Predict

LESSON 2
Properties of Waves  
Unlock the Big Question  
Inquiry Skill: Calculate  
do the math! Calculate  
Explore the Big Question  
Answer the Big Question

LESSON 3
Interactions of Waves  
Unlock the Big Question  
Inquiry Skill: Observe

Study Guide & Review and Assessment  
Review the Big Question  
Apply the Big Question  
Standardized Test Prep

Science Matters  
Wall of Water  
An Operatic Superpower

Enter the Lab zone for hands-on inquiry.

Scenario Investigation: Rogue Wave

Chapter Lab Investigation:  
Directed Inquiry: Making Waves  
Open Inquiry: Making Waves

Inquiry Warm-Ups:  
What Are Waves?  
What Do Waves Look Like?  
How Does a Ball Bounce?

Quick Labs:  
What Causes Mechanical Waves?  
Three Types of Waves  
Properties of Waves  
What Affects the Speed of a Wave?  
Wave Interference  
Standing Waves

Go online for engaging videos, interactivities, and virtual labs.
CHAPTER 10

Electromagnetic Waves

The Big Question ............................................. 326
What kinds of waves make up the electromagnetic spectrum?

Vocabulary Skill: Greek Word Origins ........ 328
Reading Skills .................................................. 329
Scenario Investigation: Catching the Waves ........ 330

LESSON 1
The Nature of Electromagnetic Waves .......... 332
Unlock the Big Question ............................... 332
Inquiry Skill: Calculate ................................. 333

LESSON 2
Waves of the Electromagnetic Spectrum .... 336
Unlock the Big Question ............................... 336
Inquiry Skill: Communicate ......................... 341
Explore the Big Question ......................... 343
Answer the Big Question ......................... 343

LESSON 3
Wireless Communication .......................... 344
Inquiry Skill: Interpret Data ......................... 347
do the math! Analyzing Data ....................... 347

Study Guide & Review and Assessment .... 352
Review the Big Question ....................... 352
Apply the Big Question ....................... 354
Standardized Test Prep ............................. 355

Science Matters .............................................. 356
* Channel Surfin’ on an Infrared Wave * Puny Power Plants

Enter the Lab zone for hands-on inquiry.

Scenario Investigation: Catching the Waves
Chapter Lab Investigation:
* Directed Inquiry: Build a Crystal Radio
* Open Inquiry: Build a Crystal Radio

Quick Labs: * What Is an Electromagnetic Wave Made Of? * Waves or Particles?
* Differences Between Waves * Parts of the Electromagnetic Spectrum * How Cell Phones Work * How Does GPS Work?

PearsonRealize.com
Go online for engaging videos, interactivities, and virtual labs.
Using Scientific Inquiry

The Big Question: How do science and society affect each other?

Vocabulary Skill: Identify Multiple Meanings

Reading Skills

Scenario Investigation: Casting a Vote That Makes Sense

Part 1

Lesson 1

How Scientists Work

Unlock the Big Question

Inquiry Skill: Observe
do the math! Calculate

Lesson 2

The Characteristics of Scientific Knowledge

Unlock the Big Question

Inquiry Skill: Interpret Data

Lesson 3

Designing an Experiment

Unlock the Big Question

Inquiry Skill: Develop Hypotheses
do the math! Graphing Data

Lesson 4

Scientific Literacy

Unlock the Big Question

Inquiry Skill: Interpret Data

Explore the Big Question

Answer the Big Question

Study Guide & Review and Assessment

Review the Big Question

Apply the Big Question

Standardized Test Prep

Science Matters

* A Recipe for Success * Beware of Greenwashing

Enter the Lab zone for hands-on inquiry.

Scenario Investigation: Casting a Vote That Makes Sense

Chapter Lab Investigation:

* Directed Inquiry: Become a Learning Detective

* Open Inquiry: Become a Learning Detective

Inquiry Warm-Ups:

* How Does a Scientist Think? * Developing a Theory * What’s the Question? * Posing Questions

Quick Labs:

# Mathematics and Models in Science

## Lesson 1: Scientific Measurement
- **Unlock the Big Question**: 406
- **do the math! Calculating Using SI Units**: 408
- **Inquiry Skill: Measure**: 411

## Lesson 2: Mathematics and Scientific Thinking
- **Unlock the Big Question**: 416
- **Inquiry Skill: Interpret Data**: 417
- **Explore the Big Question**: 418
- **Answer the Big Question**: 419

## Lesson 3: Using Graphs in Science
- **Unlock the Big Question**: 420
- **Inquiry Skill: Graph**: 421

## Lesson 4: Models and Systems
- **Unlock the Big Question**: 422
- **Inquiry Skill: Make Models**: 426

## Lesson 5: Safety in the Science Laboratory
- **Unlock the Big Question**: 430
- **Inquiry Skill: Observe**: 431

## Study Guide & Review and Assessment
- **Review the Big Question**: 436
- **Apply the Big Question**: 438
- **Standardized Test Prep**: 439

## Science Matters
- The Race to Be Faster
- Aquanauts

## Appendices, English/Spanish Glossary, Index
- 442
